

THE ACWD CONNECTION

August is National Water Quality Month!

Let's celebrate National Water Quality Month and **remember the importance** of safe drinking water! We turn on our tap without a second thought, but in reality your water has gone through an extensive process before it reaches you. Here are some fun facts about your drinking water quality:

- ◆ In 2017, ACWD's state-certified laboratory and satellite laboratories analyzed for more than 180 substances in our treated water.
- ◆ Your water meets or surpasses all federal and state drinking water standards!
- ◆ Approximately 30,000 water quality analyses are conducted annually.
- ◆ Laboratory technicians visit 53 sample points weekly.
- ◆ Tap water is safe to drink—and it is delivered 24/7!

2017 Water Quality Report available
